

This is in regards to NAB's petition 04-160. I pay for XM Satellite radio every month and i constantly listen to the traffic and weather for my area. I deserve to have it on XM. This is infringement on my rights as an American to have the right to listen to what i want, especially when i pay for it. We can not allow this lobbying to go on any further. Since when is it illegal for people to have a live update on weather and traffic? Most of us are unable to get live weather and traffic on the local FM stations and it is very nice to have it available on XM. Please stop this from happening.

If NAB is afraid of competition then they should compete. I as a consumer can't help that the programming on FM radio is dull, and now that i have options NAB wants my options to listen to what i like and want to listen to taken away.
